

EXPECT MORE UNDER DROUGHT CONDITIONS

Plants under a regular **Nature's Wonder® Plant & Turf Booster™** maintenance program have been proven to maintain quality with up to 30% less irrigation.

Whether the period of drought is expected to come and go this season or such conditions are now considered your "new normal", you can reduce the impact on your plants with the ultimate soil and plant health technology- Nature's Wonder® Plant & Turf Booster™. This revolutionary product is a 3-in-1 organic & sustainable climate smart solution produced from 10,000 year old, naturally occurring materials utilizing a unique proprietary process. Nature's Wonder® is available in a liquid formulation.

Enhance fertilizer and water efficiency by increasing plant chlorophyll levels and accelerating plant metabolic performance.

Increase plant turgidity by improving the plant's ability to move water more efficiently.

Enhance soil nutrient retention and make nutrients more available to the plant by enhancing the activity and growth of native microbial population.

Dramatically reduce potential of root loss under stressful conditions by increasing root mass, density, and strength.

Meets NOP standards for organic crop production
