

Biostimulant & Soil Amendment

THE BEST FRIEND A MICROBE COULD EVER HAVE!

It is important to understand the significance of maximizing the microbial activity in your soil. Healthy and active microbes are the genesis of healthy soil, plants and crops because they process the nutrients into root-accessible forms. Using the proper additive can maximize microbial performance, improving your soil, your fertilizer and your overall operations.

It is time to introduce your soil microbes to their new best friend- Nature's Wonder® Plant & Turf Booster™. There is nothing on the market today that can match the performance of Nature's Wonder® for boosting microbial population growth & activity (by 4-5x!)

MICROORGANISM 'A'

Certain microorganisms metabolize our formulation directly, stimulating their activity & releasing enzymes and metabolites important for soil and plant health.

MICROORGANISM 'B'

Other microorganisms are stimulated by the enzymes and metabolites from 'A' microorganisms, further contributing to soil and plant health.

CHAIN REACTION

Continued treatment allows this beneficial chain reaction to persist indefinitely, further improving soil structure long-term.

RESULTS

The beneficial interaction of the symbiotic microbes boosted by Nature's Wonder® ultimately results in enhanced fertilizer efficiency, plant turgidity, soil structure, and soil & plant performance.
